

## Let's Build an All New Modern Farm and Food Hub

Fable is a farm, market, and educational site founded in Yorktown in 2015 to bring healthy food and educational opportunities to the community. With a recent lack of land security, combined with the growing needs of a small business, this has led our once prosperous and profitable farm to start to decline. Given this recent hardship, but with the growing support and demand from the community, we will be relocating this Fall.

As you can imagine, moving a farm with greenhouses, mobile coops, and a market full of appliances, will be no easy feat. **With your help we know we can do it.** Funds raised will be used to pay for the relocation, permits and reconstruction of our greenhouses, moving all equipment and assets, pay existing suppliers and vendors, an expanded and redesigned market, an outdoor seating area, driveway light posts, educational farm signage, and more.

**It's time to dream big!** Let's create a modern day farm and food hub with no restrictions on livestock, more flexibility, more cooking and educational classes, and increased community events, with all the profit being invested back into the farm, the land, and the community who helps build it. We thank you so much for your support!
